

EpiLab S

Your way into the laser business

BROCHURE NOT FOR THE U.S.A.

Asclepion
Laser Technologies

Asclepion laser hair removal technology is the preferred choice for all those who want to start in the laser business.

We have used our many years of experience in the laser market to develop the EpiLab S diode laser. It combines intuitive operation, professional handling and a high level of effectiveness.

Just what you need to be successful.

Are you ready

for your way into the laser business?

Move with the times!

Asclepions advantage lies in the innovative and unchallenged technologies. This means that it is always possible to use the products professionally and safely, even if you have little or no experience with our systems. The EpiLab S relies on this type of technology: Ideal for start-ups and those who have lots of experience in the aesthetic market but have never worked in field of lasers.

***... and do
it in style.***

As a specialist in the aesthetic market, you already know how important it is for products to look good. That is why we paid particular attention to the design – so that it would suit your needs.

We present to you the ...

EpiLab S

Your professional partner

Your experience paired with our performance – your entry into the laser business. So that you can achieve great results from the get-go, we equipped the EpiLab S with our safe and easy-to-use handpiece.

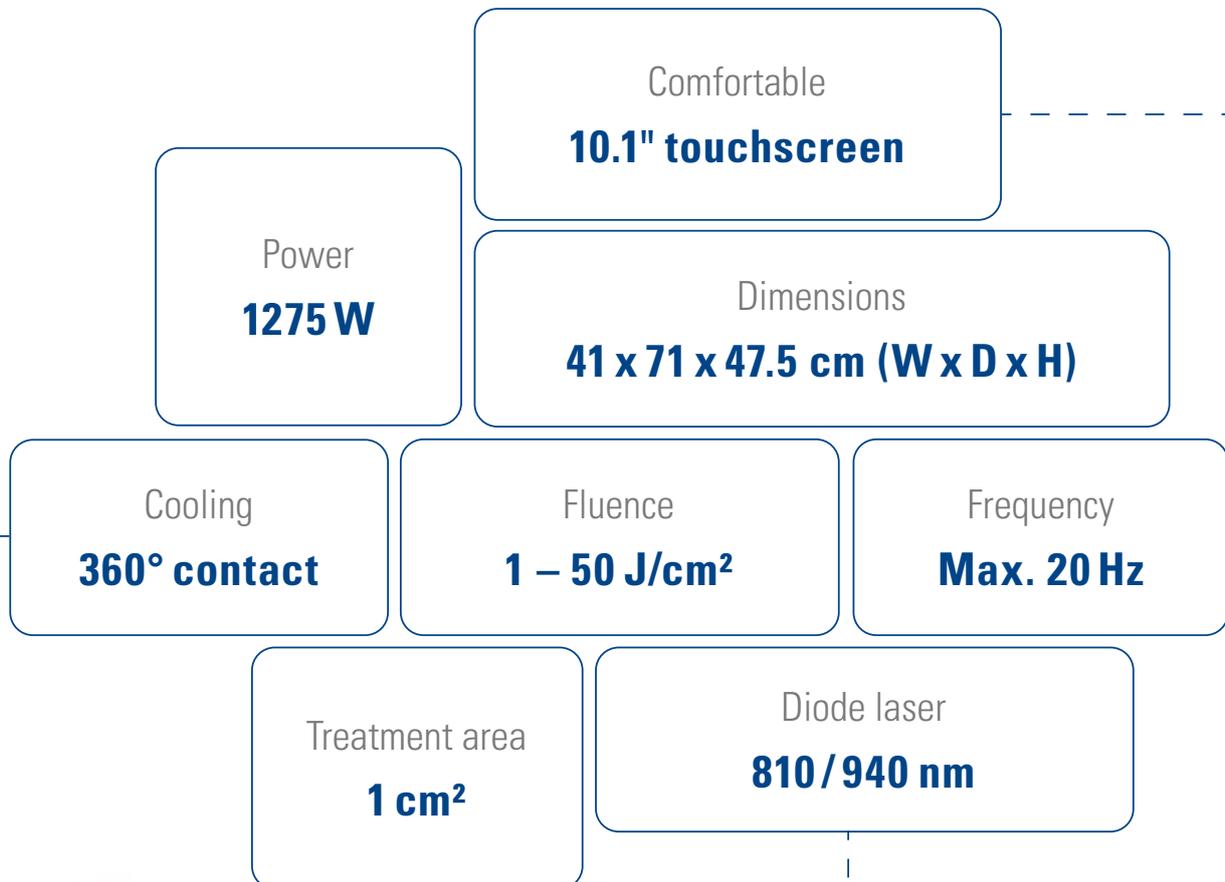

Good results and safe to use

For a professional result, the treatment has to be effective and safe for the client. This is why we have integrated our powerful 360° skin cooling into the EpiLab S. This lets us guarantee a controlled and consistent temperature throughout the treatment.

The EpiLab S in numbers

How do you get ahead of your competitors? It's easy – with our high performance laser and ergonomic, safe handpiece combined with a unique technology.

Intuitive performance

The self-explanatory software makes it easy to achieve very successful results: There is a touchscreen with an intuitive user interface and lots of preset programs that are ready for use straight away. From medical history through to treatment in just one click.

Why Asclepion? Simple and safe.

Easy to get started

With our many years of experience and expertise in training, we make it easy for you to get started with the Asclepion technology. Take the first step by participating in a professional training session that focuses on quality and safety – our laser experts are always on hand to help.

Easy to get support

Asclepion is a reliable partner to have. We support you with any questions you have regarding the technology, how to use the product and marketing. No one knows the technology better than we do. Manufactured in Jena, they proudly bear the »Made in Germany« seal of quality.
